

Federal Acquisition Institute

# **FAI Cornerstone OnDemand (FAI CSOD) Migration**

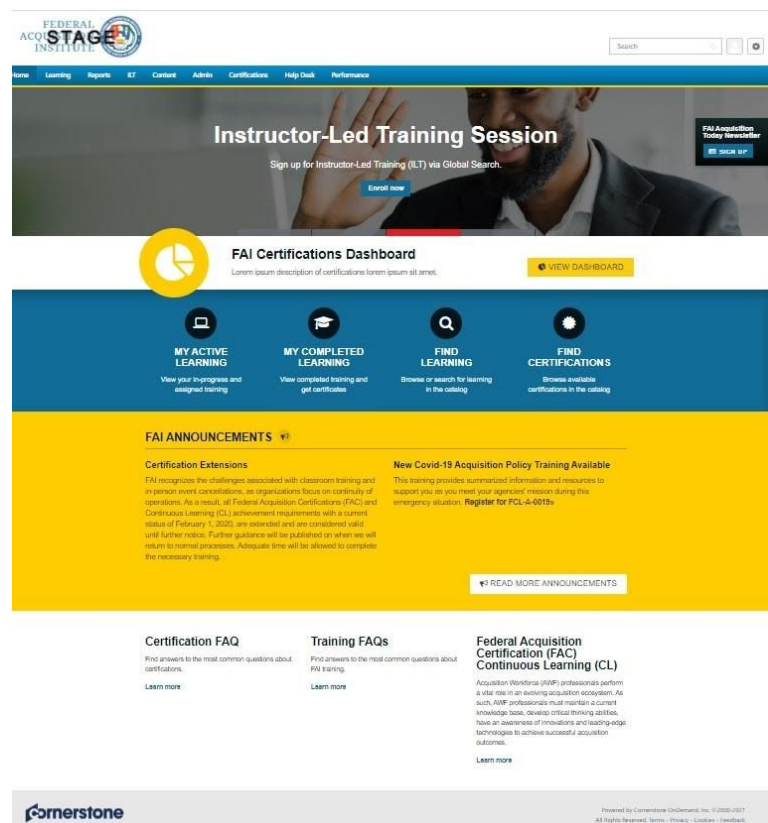

## **Change Management Strategic Playbook**

# Strategy

**Value Proposition:** FAI CSOD will provide Acquisition Workforce (AWF) members with a modern and commercial-off-the-shelf (COTS) service that is reliable and consistently updated based on best practices. The Federal Acquisition Institute Training Application System (FAITAS) was built on a customized government platform. Our diverse stakeholder community requires 24/7 access to a modern, scalable, and secure workforce management solution to support the demands of a 21st Century Government.

## Key Benefits:

- ✓ **Reliable Access:** Commercial cloud-based system that maintains 99.9% uptime.
- ✓ **Modern Interface:** Industry-leading, intuitive, user-friendly platform.
- ✓ **Standard Features:** Functionality developed based upon industry-wide best practices and feedback from more than 6,000 global clients and over 75 million users.
- ✓ **Continuous Enhancements:** Regular upgrades to support millions of users across private and public sectors at no additional cost.
- ✓ **Secure Transfer:** DAU has successfully transitioned multiple government organizations to CSOD and has proven performance in securely migrating users' profiles and data.
- ✓ **Familiar Experience:** Many FAITAS users have taken classes through DAU's CSOD and are familiar with its student guides, task aids, training, and other resources.

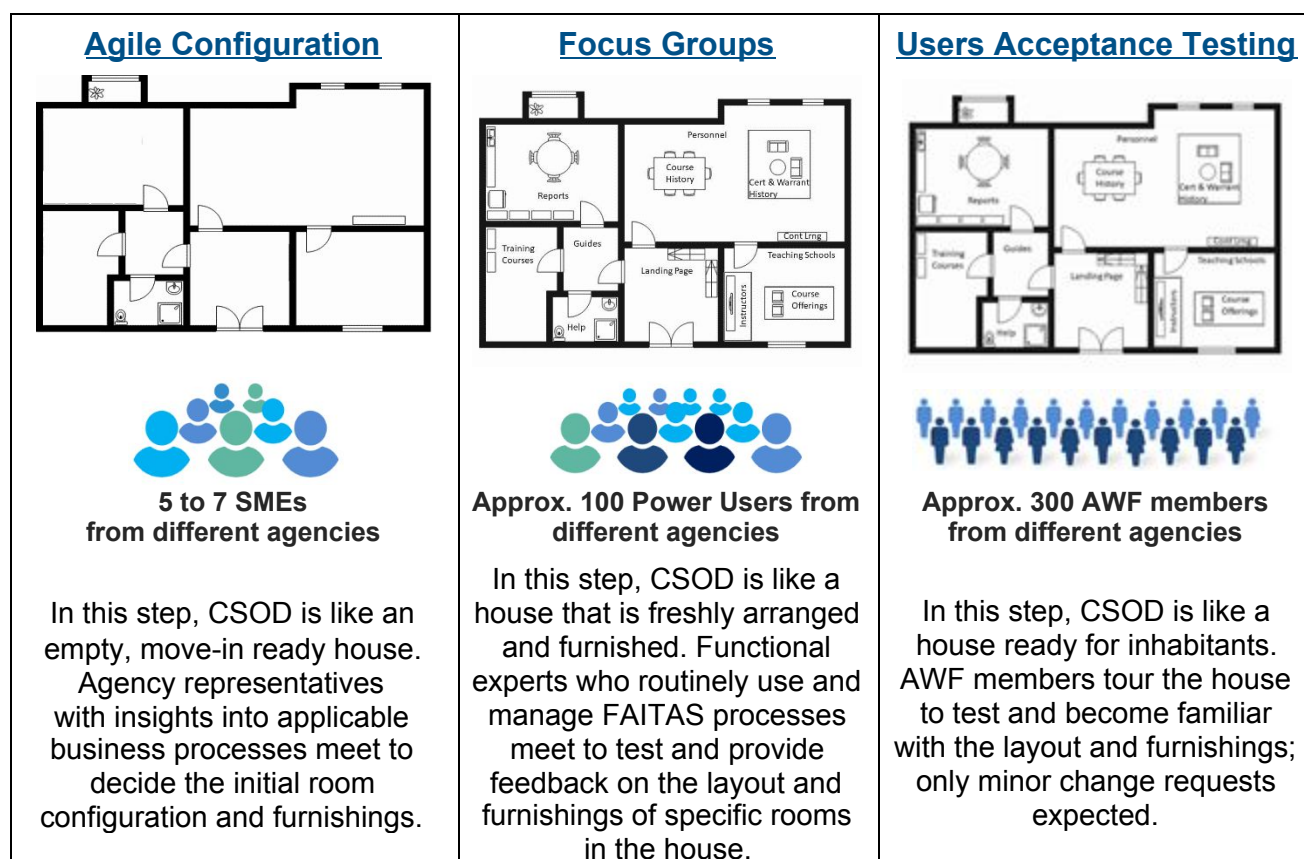

# Configuration Steps

**Step 1 – Agile Configuration (Fall ‘20):** In collaboration with our partners and SMEs, FAI defined the functionality for the new FAI CSOD platform to best serve the needs of the AWF. As the service provider, DAU is responsible for the configuration, deployment, and operational support of the new platform. Configuration focused on retaining essential features of FAITAS and capitalizing on enhanced CSOD features.

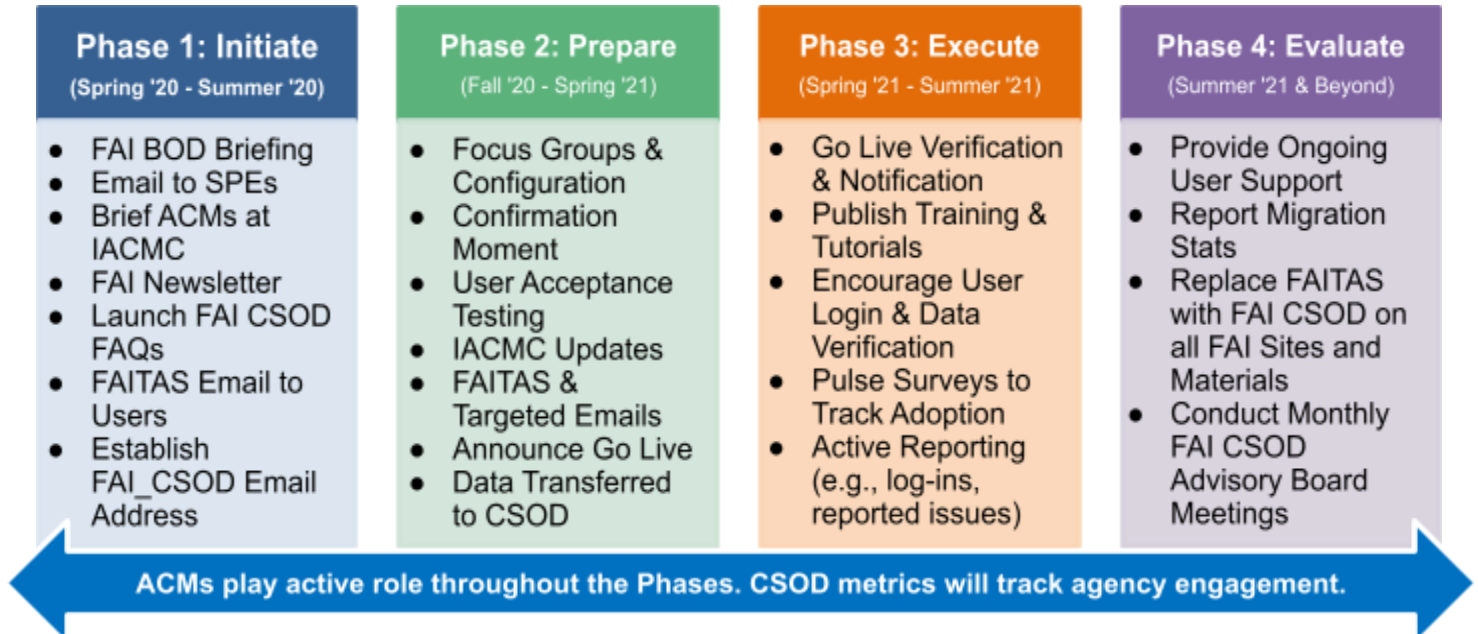

**Step 2 – Focus Groups (Fall ‘20 - Winter ‘21):** We invited AWF leaders and members from every CFO Act agency and many small agencies to validate the business requirements and test the configurations. This active stakeholder engagement will optimize government-wide adoption and buy-in.

**Step 3 - Users Acceptance Testing (Winter ‘21):** A cross-section of AWF members who will manage their certifications and training in CSOD become familiar with the system and verify configuration and data transfer.

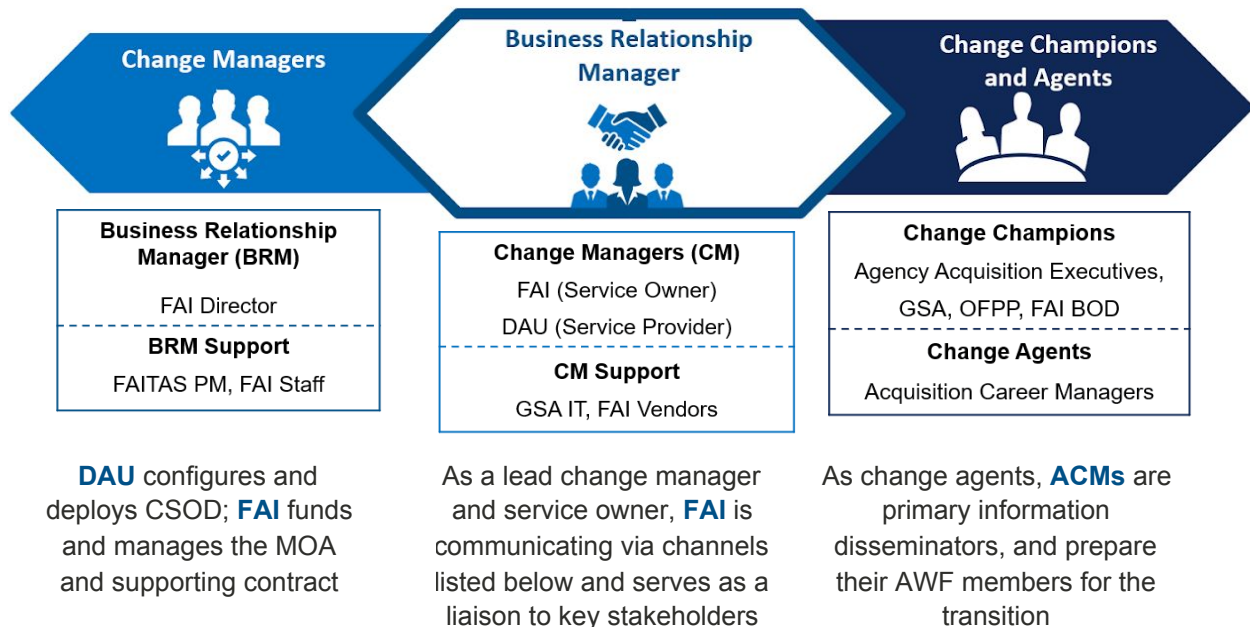

# Change Management & Communications

## Change Management Phases:

**Roles:** Moving from a custom built, legacy system to a commercial solution is a significant change for our diverse user community - approximately 260K AWF members. Change managers, business relationship managers, and the network of change champions and agents play a critical role in CSOD transformational change.

**Multi-Channel Communications:** To effectively communicate with stakeholders, FAI will use a multi-prong communication strategy and apply a number of methods to reach our stakeholders and users to include:

<p><b>Newsletters</b></p>  <p>July 15, 2020</p> <p><b>Nominations for the 2020 Acquisition Excellence Awards Extended and Expanded</b></p> <p>To recognize acquisition professionals who contribute to outstanding improvements in acquisition throughout the federal government, the Chief Acquisition Officers Council (CAOC) is seeking nominations for the 2020 Acquisition, Program Management, and Small Business Excellence Awards. The CAOC Council has extended the nomination period for the Acquisition, Program Management, and Small Business Excellence Awards two months to Friday, July 31. In addition, the CAOC Council is permitting nominations for</p> <p>Acquisition Today articles keep 250K+ readers informed of key CSOD transition highlights</p>	<p><b>FAITAS Email Blasts</b></p>  <p>The FAITAS email service will be used to communicate directly with the AWF regarding important dates and action items in preparation for the transition</p>	<p><b>Targeted Emails</b></p>  <p>FAI will prepare targeted messages for ACMs to refine and send to their AWF members</p>
